

Quarterly Report

Mathew Point

April 21, 2021

Portfolios

Health:

- monthly health meetings were participated in.
- private phone calls with Director were made if I was unavailable

Comments: I think our direction toward trauma and prevention not intervention is a good thing.

Lands:

- Most lands meetings were attended
- Received updates if schedules conflicted from a committee member

Comments: I respect the work our lands committee has to do and I also appreciate the diversity and strengths everyone has to offer.

Education:

- There has been plenty of work around jurisdiction this year
- Meetings were ongoing with staff and committee work

Comments: As there were a lot of changes staff, members, and with covid it was kind of complicated but the work still got done.

Sq'ep:

- Meetings were once on Friday evenings
- Turnover of staff so we are re-organizing

Comments: Really appreciate the work and participation thus far. We all have different backgrounds and experiences and are implementing our practices and perspectives well.

Fishing:

- There are weekly Eulachon meetings that update us on the catch

Comments: We have had a couple planning meetings within the community. I have talked to a few fishers of my view and direction I want to take as well as I plan to further my engagement with Kwantlen for some Eulachon for our elders.
